The Oxford Handbook of Critical Care provides a perfect reference source for consultants, junior doctors, nurses and paramedical staff describing best practice in a succinct, concise, clinically orientated way. It covers therapeutic and monitoring devices, drugs and fluids, specific organ system disorders and complications, and general management philosophies and material on areas such as adjusting the ventilator; managing ARDS; haemodynamic monitoring stroke; the control, diagnosis and treatment of infection; sepsis and septic shock, and withdrawal and withholding treatment. Patient centred and practical with up-to-date key references, it continues to be the first port of call for anyone caring for critically ill patients. This bundle of the book and PDA version represents exceptionally good value. The Oxford Handbook of Critical Care for PDAs enables enhanced, multi-layered access to the entire text, illustrations and tables. Fast access is available via the table of contents, index and full-text search, and there is a facility for book-marking and annotating the text.
